THE SOUTH'S BULB GROWERS

Buy Home Grown Bulbs

Boost Your Home Industries

Our farms located 18 miles from Washington, N. C.

at Terra Ceia, (Heavenly Land) N. C.

Herewith we are pleased to offer you our list of fine Gladiolus bulbs for Spring Planting. In the south these bulbs can be planted any time between January and August, and if planted at different times flowers can be had from the latter part of May until frost hits them in the Fall. They will give the best results in rich well drained soil. Plant about three to four inches deep.

To make our bulb list more complete we have also added this year a few of the better Dahlia's—these should be planted when frost danger is over.

We have listed here only what are at the present time considered the best varieties of Gladiolus, but can supply any other variety you wish to have. If you desire varieties not listed here, please write us about it.

We wish to take this opportunity, also to invite all of our customers and friends to visit our farm this spring when the tulips bloom. The roads are hardsurfaced now within $1\frac{1}{2}$ mile of our farm.

GLADIOLUS BULBS

Color	Per 100	Per doz.
